Overview

Measure Name

CMS 135 v13: Heart Failure (HF): Angiotensin-Converting Enzyme (ACE) Inhibitor or Angiotensin Receptor Blocker (ARB) or Angiotensin Receptor-Neprilysin Inhibitor (ARNI) Therapy for Left Ventricular Systolic Dysfunction (LVSD)

Description

Percentage of patients aged 18 years and older with a diagnosis of heart failure (HF) with a current or prior left ventricular ejection fraction (LVEF) $\leq 40\%$ who were prescribed or already taking ACE inhibitor or ARB or ARNI therapy during the measurement period.

Definition

Prescribed: prescription given to the patient for ACE inhibitor or ARB or ARNI therapy at one or more visits in the measurement period OR patient already taking ACE inhibitor or ARB or ARNI therapy as documented in current medication list.

LVEF $\leq 40\%$ corresponds to qualitative documentation of moderate dysfunction or severe dysfunction (LVSD). The LVSD may be determined by quantitative or qualitative assessment, which may be current or historical. Examples of a quantitative or qualitative assessment may include an echocardiogram: 1) that provides a numerical value of LVSD or 2) that uses descriptive terms such as moderately or severely depressed left ventricular systolic function. Any current or prior ejection fraction study documenting LVSD can be used to identify patients.

Guidance

This eCQM is to be reported as patient-based. To satisfy this measure, it must be reported for all heart failure patients at least once during the measurement period if seen in the outpatient setting.

The requirement of two or more visits is used to establish that the eligible clinician has an existing relationship with the patient.

A range value should satisfy the logic requirement for 'Ejection Fraction' as long as the ranged observation value clearly meets the less than or equal to the 40% threshold noted in the Denominator logic. A range that is greater than 40% would not meet the measure requirement.

In order for the Ejection Fraction result pathway to be recognized as below 40%, the result must be reported as a number with unit of %. A text string of "below 40%" or "ejection fraction between 35 and 40%" will not be recognized through electronic data capture. Although, this criteria can also be met using the Diagnosis pathway if specified as "Moderate or Severe."

Eligible clinicians who have given a prescription for or whose patient is already taking an Angiotensin-Converting Enzyme Inhibitor (ACEI) or Angiotensin Receptor Blocker (ARB) would meet performance for this measure. Other combination therapies that consist of an ACEI plus diuretic, ARB + neprilysin inhibitor (ARNI), ARB plus diuretic, ACEI plus calcium channel blocker, ARB plus calcium channel blocker, or ARB plus calcium channel blocker plus diuretic would also meet performance for this measure.

This version of the eCQM uses QDM version 5.6. Please refer to the eCQI resource center (<https://ecqi.healthit.gov/qdm>) for more information on the QDM.

Note: This eCQM contains Medicare telehealth-eligible codes found in encounter value sets, which can be used for in-person or telehealth encounters.

Reporting Period

January 1st, 20xx to December 31st, 20xx

NextGen HQM Supported Versions

The NextGen[®] HQM supported versions are the following:

- NextGen[®] Adaptive Content Engine 8.4.x and higher
- NextGen[®] Enterprise EHR Cures 6.2021.1 (with Patch 79) and higher

Note: Within each workflow, you must verify the specific NextGen Adaptive Content Engine or NextGen Enterprise EHR versions required.

NextGen HQM Supported Browsers

NextGen Healthcare supports the following third-party web browsers for NextGen HQM:

- Google Chrome[™]: current plus one previous major version
 - Windows[®], macOS[®], iOS[®], Android[™]
- Microsoft Edge[®] for Windows 10: current plus one previous version
 - Windows, macOS, iOS, Android
- Firefox[®]: current plus one previous major version
 - Windows, macOS, iOS, Android
- Safari[®]: current plus one previous major version
 - Windows, macOS, iOS, Android

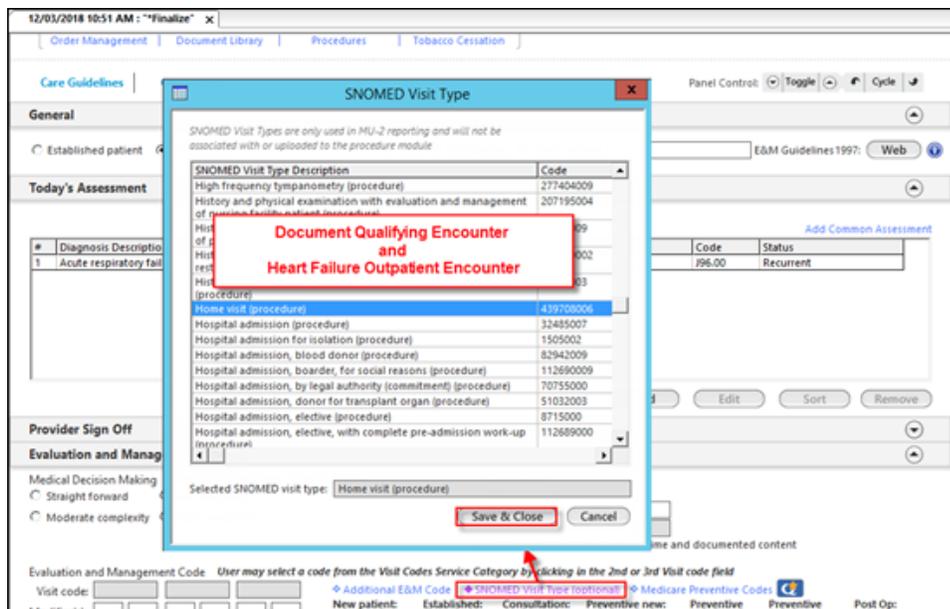

Initial Population Workflow

Data elements for the Initial Population for this measure are captured in Procedures, Diagnosis, and Problems modules, in addition to the Person table. Workflows for this Initial Population include how to document Qualifying Encounter and Heart Failure Outpatient Encounter.

Document Qualifying Encounters and Heart Failure Outpatient Encounters

Use the **SNOMED Visit Type** window, NextGen Adaptive Content Engine 8.4.x and later.

1. From the **Finalize** template, expand the **Evaluation and Management Coding** panel.
2. Select the **SNOMED Visit Type (optional)** link.
The **SNOMED Visit Type** window opens.

3. Select one of the following qualifying SNOMED encounter codes:
 - Care Services in Long-Term Residential Facility
 - Home Healthcare Services
 - Nursing Facility Visit
 - Office Visit
 - Outpatient Consultation
 - Patient Provider Interaction
4. Select **Save & Close**.

5. Save the **Finalize** template.

Note: This workflow is not required. It is an alternative to using the Procedures module to document a qualifying encounter.

Denominator Workflow

Data elements for the Denominator for this measure are also captured in the Problems and Orders modules. The Initial Population criteria is included in the Denominator.

Workflows for this Denominator include how to document ejection fraction

Documenting Ejection Fraction

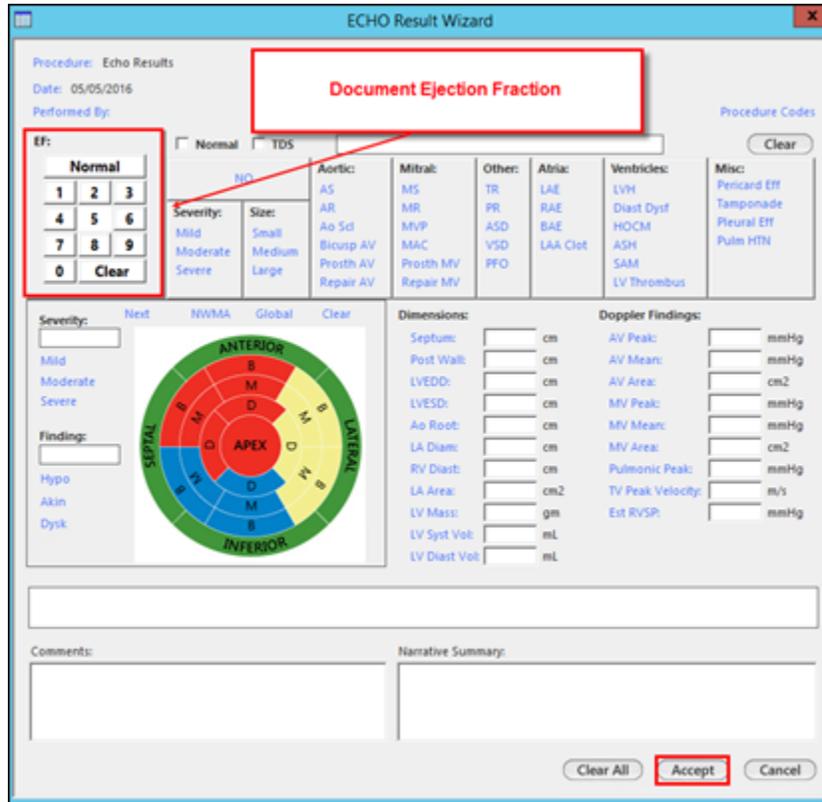

You can document the document ejection fraction on the following templates:

- **ECHO Result Wizard**
- **MPI Result Wizard**
- **Cath Result Wizard**
- **Echo GS**
- **Echocardiogram**
- **Stress Nuclear**
- **Stress Test-Card**

Note: It is not necessary to document this criterion in all of the specified templates to meet the intent of this measure.

ECHO Result Wizard Template, NextGen Adaptive Content Engine 8.4.x and Later

1. On the **Intake** template, select **Cardiology** as the specialty, and then select the **Procedures** tab.
2. From the **Cardiac Procedures** blue navigation pane, select the **Echo/MUGA** link.
3. From **Echo/MUGA**, select any option.
The **ECHO Result Wizard** template opens.

4. Enter the details in **LVEF results** using the number pad on the template, and then select **Accept** to save the LVEF results.

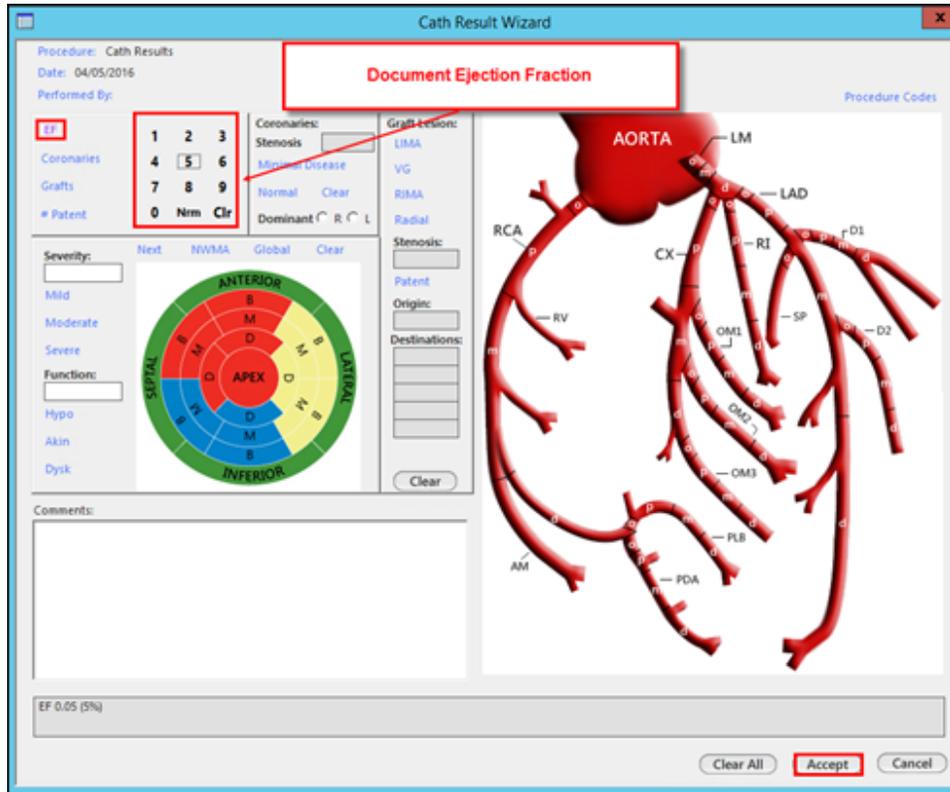

MPI Result Wizard Template, NextGen Adaptive Content Engine 8.4.x and Later

1. On the **Intake** template, select **Cardiology** as the specialty, and then select the **Procedures** tab.
2. From the **Cardiac Procedures** navigation pane, select the **Stress Test** link. The **Stress Test** picklist appears.
3. Select any option except **ETT (Exercise Tolerance Test)**. The **MPI Result Wizard** template opens.

4. Enter the details in **LVEF results** using the number pad on the template, and then select **Accept** to save the LVEF results.

Cath Result Wizard Template NextGen Adaptive Content Engine 8.4.x and Higher

1. On the **Intake** template, select **Cardiology** as the specialty, and then select the **Procedures** tab.
2. From the **Cardiac Procedures** navigation pane, select **Cath Lab** link. The **Invasive** picklist appears.
3. Select **Cath**. The **Cath Result Wizard** template opens.

4. To activate ejection fraction (EF), select the **EF** link.
The **EF** text turns purple.
5. Enter the details in **LVEF results** using the number pad on the template, and then select **Accept** to save the LVEF results.

Echo GS Result Wizard Template, NextGen Adaptive Content Engine 8.4.x and Later

1. Open the **Echo GS** template.

05/09/2018 10:16 AM: "Echo GS" X

Pt age: 17 years 4 months Reading MD: _____
Date: 05/09/2018 Tape: _____ Referring: _____
Diagnosis: _____ PCP: _____

10.	_____

Compared w/prior study, no significant changes.
 Recommend TEE if clinically indicated.
 Recommend Chest CT for further evaluation.
 Clinical correlation is recommended.

Save & Close

2. Under the **Chambers** section, in **Ejection Fraction** field, enter the LVEF results using the number pad.

Note: You must enter the percentage value in the **Ejection Fraction**.

3. Select **Save & Close**.

Echocardiogram: NextGen Adaptive Content Engine 8.4.x and Later

1. Open the **Echocardiogram** template.

The screenshot shows the 'Echocardiogram' template interface. The 'Pre-Procedure Care' section has several checkboxes for consent and identification. The 'Test/Patient Data' section includes fields for test date (05/11/2018), test type (Internal), location (Main Clinic), and referring physician. The 'Medications' and 'Indications' sections are also visible. The 'LV Systolic Function' section features a diagram of the heart with various segments labeled. A red box highlights the 'Ejection fraction' field, which is set to 35%. A red arrow points to this field with the text 'Document Ejection Fraction'. The 'RV Systolic Function' and 'Diastolic Function' sections are also visible.

2. Under the **LV Systolic Function** section, in **Ejection Fraction**, enter the LVEF results using the number pad.

Note: You must enter the percentage value in the **Ejection Fraction**.

3. Select **Save & Close**.

Note: This workflow requires user configuration of CRS 2.0 to support accurate reporting. You must ensure that the mappings are added to the **Coded Results Mapping** template.

Stress Nuclear: NextGen Adaptive Content Engine 8.4.x and Later

1. Open the **Stress Nuclear** template, and then under the **Resting** section, in **Resting LVEF** field, enter the LVEF results.

The screenshot shows the 'Stress Nuclear' form with the following details:

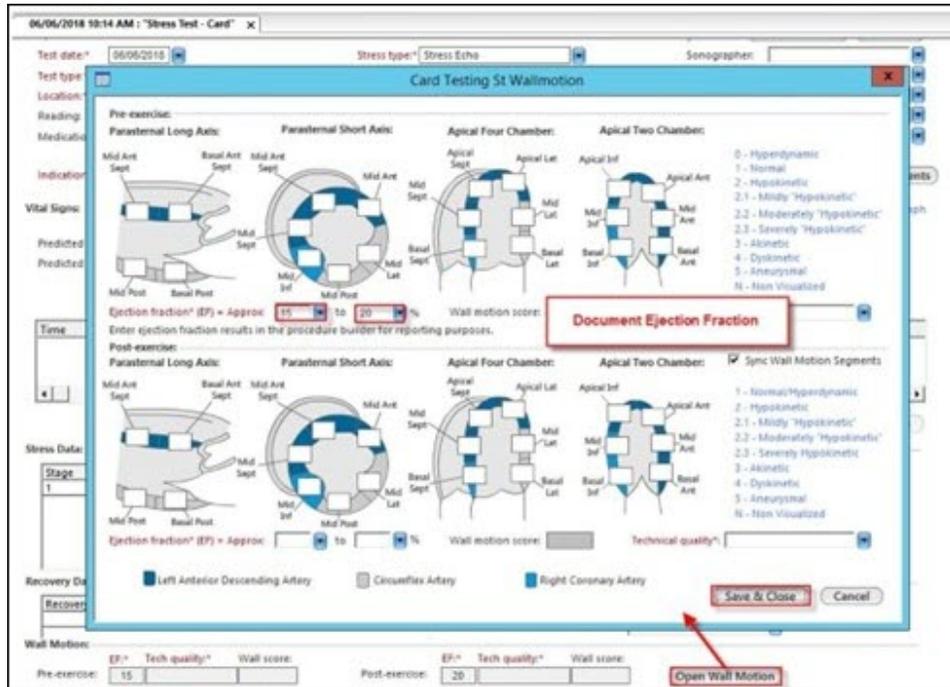

- Study Date:** 06/06/2018
- Resting LVEF:** 35 %
- Resting Section:** Normal resting wall motion
- Buttons:** Save & Close, Stress Nuclear Doc, Stress Master Doc

Note: You must enter the percentage value in **Resting LVEF** .

2. Select **Save & Close**.

Stress Test-Card: NextGen Adaptive Content Engine 8.4.x and Later

1. Open the **Stress Test-Card** template, and then under the **Procedure Information** section, in **Test/Patient Data**, select **Stress Echo** for the **Stress** type.
2. In the **Wall Motion** section, select **Open Wall Motion**.
The **Card Testing St Wallmotion** template opens.

3. Under the **Pre-exercise** section, in **Ejection Fraction**, enter the LVEF results.

Note: You must enter the percentage value in **Ejection Fraction**.

4. Select **Save & Close**.

Note: This workflow requires user configuration of CRS 2.0 to support accurate reporting. You must ensure that the mappings are added to the **Coded Results Mapping** template.

Denominator Exclusion Workflow

Data elements for the Denominator Exclusions for this measure are also captured in the Procedures, Problems and Diagnosis modules, in addition to the Person table and by using and the Screening Tools Log Configuration in System\Practice template.

Note: Ensure that the appropriate LOINC and SNOMED codes are mapped using the Screening Tools Log Configuration.

Workflows for the Denominator Exclusions include how to:

- Document History of Heart Transplant
- Document Left Ventricular Assist Device (LVAD)

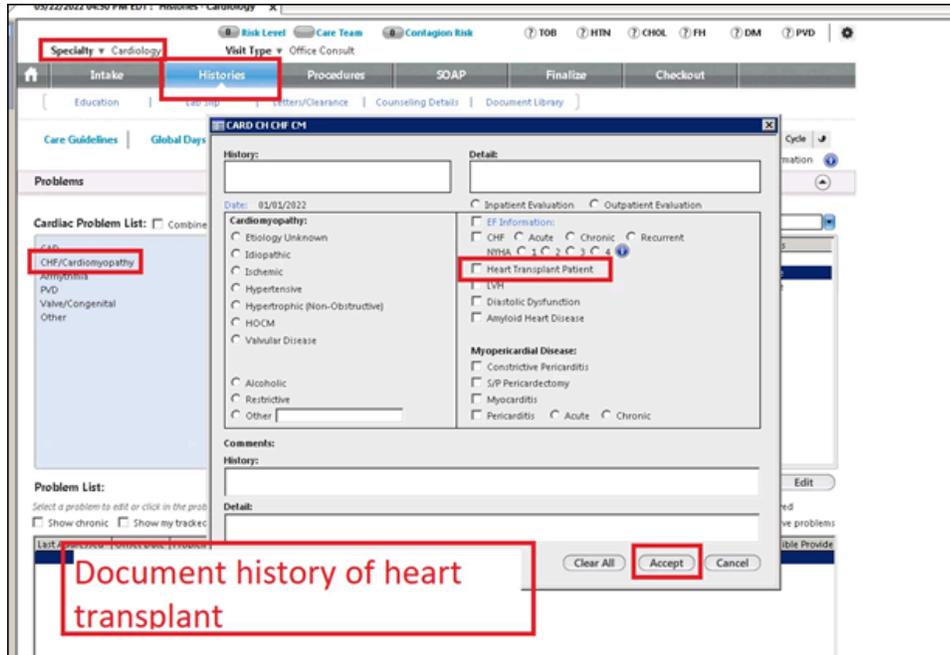

See Also

- [Configure Screening Tools Logs](#)

Document History of Heart Transplant

Use the CARD_CH_CAD template, NextGen Adaptive Content Engine 8.4.x and later.

1. On the **Intake** template, select **Cardiology** as the specialty and any visit type.
2. Select the **Histories** tab.
The **Histories - Cardiology** template opens.
3. From the **Problems** section, select the **CHF/Cardiomyopathy** link from the navigation bar.
The **CARD_CH_CHF_CM** template opens.

4. Enter the procedure date.
5. In the **Detail** section, select the **Heart Transplant Patient** check box.
6. Select **Accept**.

Note: This workflow requires user configuration of CRS 2.0 to support accurate reporting. You must ensure that mappings are added to the **Coded Results Mapping** template.

- [CRS 2.0 Configuration](#)

Document Left Ventricular Assist Device (LVAD)

Use the VAD Test Result Wizard template, NextGen Adaptive Content Engine 8.4.x and later.

1. From the ***Intake** template, select **Cardiology** as the specialty and any visit type.
2. Select the **Procedures** tab.
3. From the left navigation pane, select **CV Surgery**, and then select **VAD**.
The **Test Result Wizard** template opens.

4. Enter the procedure date.
5. In **Type of VAL**, select **LVAD** or **BIVAD**.
6. Select **Accept**.

Note: This workflow requires user configuration of CRS 2.0 to support accurate reporting. You must ensure that mappings are added to the **Coded Results Mapping** template.

Denominator Exceptions Workflow

Data elements for the Denominator Exceptions for this measure are also captured in the Diagnosis or Problems modules. Workflows for the Denominator Exceptions include how to:

- Document Medical or Patient Reason for Not Ordering ACEI or ARB or ARNI
- Document Patient Reason for ACE Inhibitor or ARB Decline
- Document Medication, Intolerance: ACE inhibitor or ARB
- Document Medication, Allergy: ACE Inhibitor or ARB Ingredient

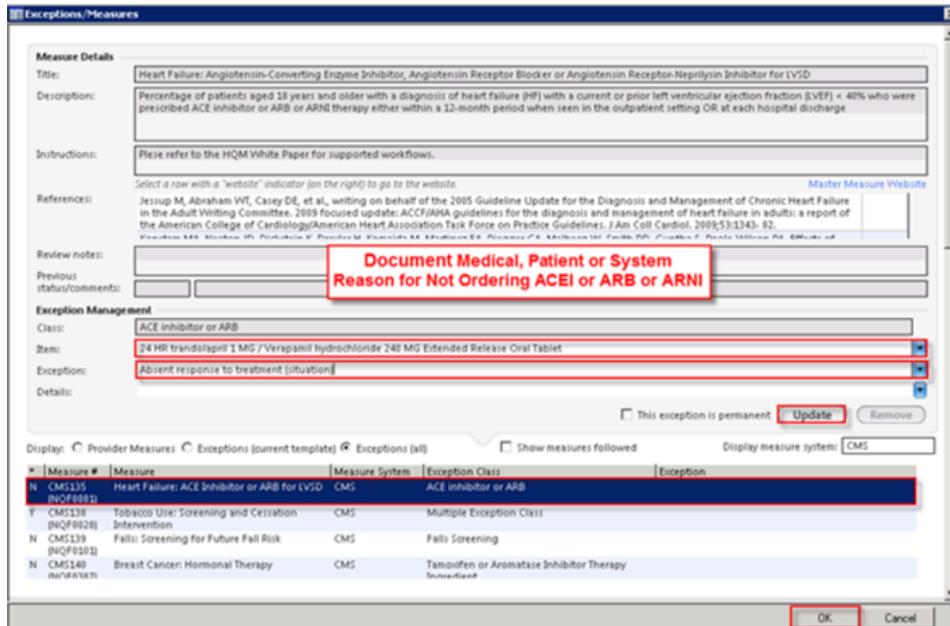

Documenting Medical or Patient Reason for Not Ordering ACEI or ARB or ARNI

You can document medical or patient reason for not ordering ACEI or ARB or ARNI on the **Exceptions/Measures** templates:

Note: Documentation of Medical or Patient Reason for Not Ordering ACEI or ARB or ARNI can be completed using any of the templates indicated in this section of the document. It is not necessary to document this criterion in all of the specified templates to meet the intent of this measure.

Exceptions/Measures Template: NextGen Adaptive Content Engine 8.4.x and Later

1. From the ***Intake** template, select **Exceptions/Measures** from the left navigation pane. The **Exceptions/Measures** template opens.

2. Select the **Exceptions (all)** option.
3. Select Measure #: **CMS135**, Measure: **Heart Failure: Ace Inhibitor or ARB for LVSD** and Exception Class: **Ace Inhibitor or ARB** to be addressed in the fields above.
4. In **Item**, select one of the qualifying options from the list of ACE Inhibitor or ARB RxNorm codes.
5. In **Exception**, select a qualifying **Medical** or **Patient** reason from the list of values for denominator exceptions section.
6. Select **Update**, and then select **OK**.

- [List of Values for Denominator Exceptions](#)

Documenting Patient Reason for ACE Inhibitor or ARB Decline

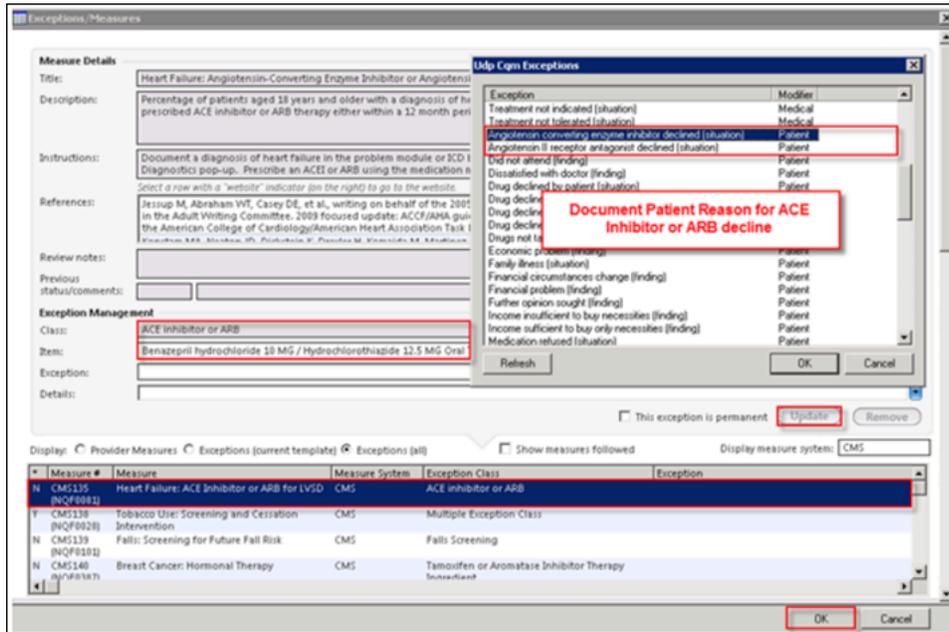

Note: You can document patient reason for ACE Inhibitor or ARB Decline on the following templates:

- **Exceptions/Measures**

Note: Documentation of Patient Reason for ACE Inhibitor or ARB Decline can be completed using any of the templates indicated in this section of the document. It is not necessary to document this criterion in all of the specified templates to meet the intent of this measure.

Exceptions/Measures: NextGen Adaptive Content Engine 8.4.x and Later

1. From the ***Intake** template, select **Exceptions/Measures** from the left navigation pane. The **Exceptions/Measures** template opens.

2. Select the **Exceptions (all)** option.
3. Select Measure #: **CMS135**, Measure: **Heart Failure: Ace Inhibitor or ARB for LVSD** and Exception Class: **Ace Inhibitor or ARB** to be addressed in the fields above.
4. In **Item**, select one of the qualifying options from the list of ACE Inhibitor or ARB RxNorm codes.
5. In **Exception**, select a qualifying **Angiotensin converting enzyme inhibitor declined (situation)** or **Angiotensin II receptor antagonist declined (situation)** reason from the **Udp Cqm Exceptions** picklist.
6. Select **Update**, and then select **OK**.

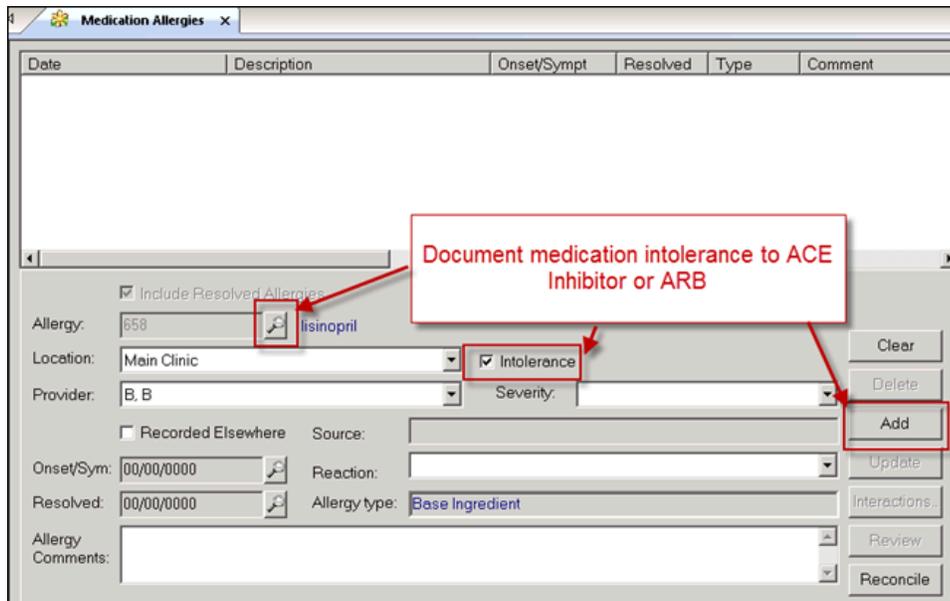

See Also

- [List of Values for Denominator Exceptions](#)

Document Medication Intolerance to ACE inhibitor or ARB

You can document medication intolerance to ACE inhibitor or ARB using Medication Allergies module.

1. In the Allergy module, search for an ACE inhibitor or ARB medication in the List of ACE Inhibitor or ARB RxNorm under the List of Values for Denominator Exceptions section.

2. Select the **Intolerance** check box.
3. Select **Add**.

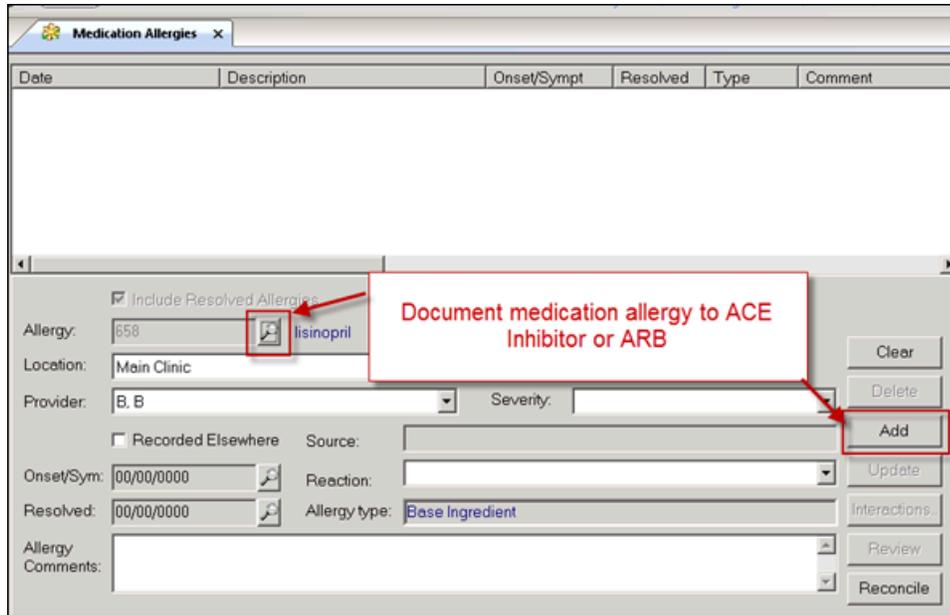

See Also

- [List of Values for Denominator Exceptions](#)

Document Medication Allergy to ACE inhibitor or ARB Ingredient

You can document medication allergy to ACE inhibitor or ARB ingredient using the Allergy module.

1. In the Allergy module, search for and add an ACE inhibitor or ARB ingredient medication as listed in the List of ACE inhibitor or ARB Ingredient RxNorm list under the List of Values for Denominator Exceptions section.

2. Select **Add**.

Special Considerations

Denominator Exceptions criteria for all CQM measures are excluded from the Numerator. See below for CMS definition:

- **Denominator Exceptions (DException)**: A subset of the Denominator. Only those members of the Denominator that are considered for Numerator membership and are not included are considered for membership in the Denominator Exceptions.

This measure reports on unique patients.

This measure will be incremented across the enterprise if enterprise chart is enabled.

Assumptions

For more information on NextGen HQM Assumptions, refer to https://www.community.nextgen.com/articles/White_Papers/Assumptions-for-Health-Quality-Measures-Portal-Measures-Papers.

Configure Screening Tools Logs

1. Open NextGen Enterprise EHR.
2. Select **File > System \ Practice Template**.
The **Select Template** window opens.
3. Select the **Practice** tab, and then select **Data Sets Setup**.
The **Data Sets Setup** template opens.
4. From **Data Set**, select **Screening Tools Log**, and then select **Add**.
The **Screening Tools Log Configuration** template opens.
5. Enter the following information:
 - In **Screening Tool Name**, enter **Hospice Care Assessment**.
 - In **LOINC**, enter **45755-6** and in **Code System**, enter **LOINC**.
 - In **Code Value**, enter **373066001**.

Note: To receive credit for the **Hospice Care Assessment** tool added to the Screening Tools Log Configuration for this measure, the **Hospice Care Assessment** tool must be added and mapped to LOINC code 45755-6 with SNOMED code 373066001.

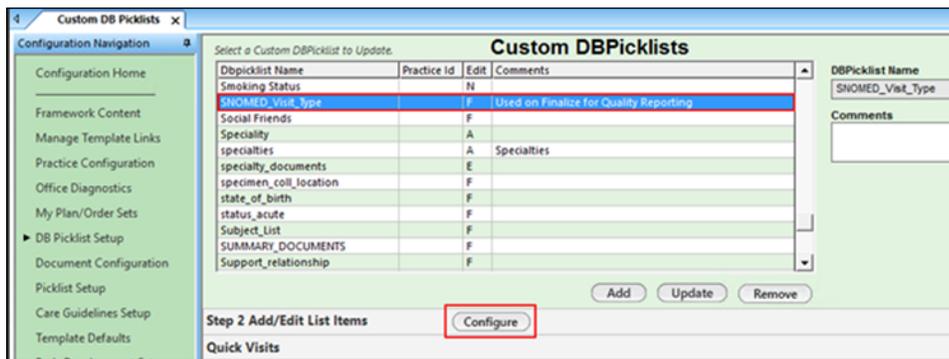

6. Select **Add**, and then select **OK**.

For detailed information about the white paper instructions, download the *Data-Sets-Setup-Practice Template User Guide* from the <https://www.community.nextgen.com/articles/UserGuides/Data-Sets-Setup-Practice-Template-User-Guide>.

Add SNOMED Visit Codes to Finalize

1. Open NextGen Enterprise EHR.
2. Select **File > System / Practice Template**.
The **Select Template** window opens.
3. Select the **System** tab, and then select **Custom DB Picklists**.
The **Custom DB Picklists** template opens.
4. Select **SNOMED_Visit_Type**, and then select **Configure**.

5. Select **Add New List Item**.

The **Custom DBPicklist Setup** window opens.

6. Enter the details for **Code Value**, **SNOMED Type**, and **Code Description**, and then select **Add**.

Custom DBPicklist Setup

DBPicklist Name: SNOMED_Visit_Type
 Practice ID:
 Location Name:
 Provider Name:
 Edit mode: Full control

Code Value: 123456test (Characters left: 90)
 SNOMED Type: visit (Characters left: 95)
 Qualifier 3: (Characters left: 100)
 Qualifier 4: (Characters left: 100)
 Code Description: snomed visit type I created (Characters left: 97)

Add Remove Update
 272 records

Practice	Code Value	SNOMED Type	Qualifier 3	Qualifier 4	Code Description

7. Verify that the configured picklist is present in the grid.

DBPicklist Name: SNOMED_Visit_Type
 Practice ID:
 Location Name:
 Provider Name:
 Edit mode: Full control

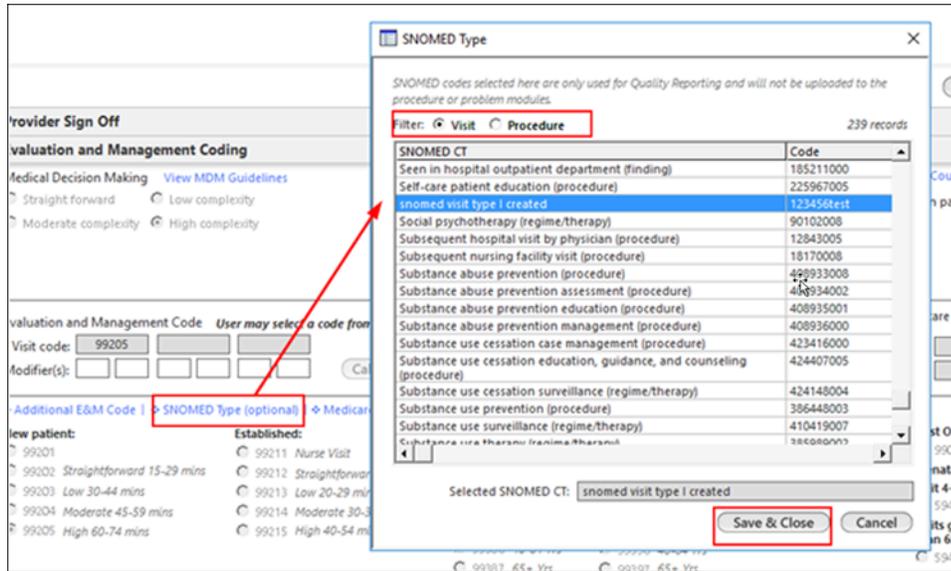

Code Value: (Characters left: 100)
 SNOMED Type: (Characters left: 100)
 Qualifier 3: (Characters left: 100)
 Qualifier 4: (Characters left: 100)
 Code Description: (Characters left: 100)

Add Remove Update
 273 records

Practice	Code Value	SNOMED Type	Qualifier 3	Qualifier 4	Code Description
	310653000	visit			Drug addiction therapy - methadone (regime/therapy)
	207195004	visit			History and physical examination with evaluation and management of nursing facility patient (procedure)
	414056002	visit			Drug dependence self detoxification (regime/therapy)
	18170008	visit			Subsequent nursing facility visit (procedure)
	270427003	visit			Patient-initiated encounter (procedure)
	183459001	visit			Admit gynecological emergency (procedure)
	63547008	procedure			Caloric vestibular test with recording (procedure)
	183473005	visit			Admit oral surgical emergency (procedure)
	108221006	visit			Evaluation AND/OR management - established patient (procedure)
	386473003	visit			Telephone follow-up (procedure)
	185321005	visit			Letter encounter to patient (procedure)
	405096004	visit			Diabetes self-management behavior (observable entity)
	50357006	visit			Evaluation and management of patient at home (procedure)
	385989002	visit			Substance use therapy (regime/therapy)
	408947007	visit			Alcohol abuse prevention education (procedure)
	426928008	visit			Prevention of opioid abuse (procedure)
	90407005	visit			Evaluation of psychiatric state of patient (procedure)
	270430005	visit			Provider-initiated encounter (procedure)
	266707007	visit			Drug addiction therapy (regime/therapy)
	185466002	visit			Home visit for urgent condition (procedure)
	68381003	procedure			Surgical removal of erupted tooth requiring elevation of mucoperiosteal flap and removal of bone and/or section of tooth (procedure)
	123456test	visit			snomed visit type I created

8. Select the row, and then select **Save & Close**.

Note: You can select the configured SNOMED visit or procedure in the **Finalize** template (to view the list you can select either **Visit** or **Procedure** option).

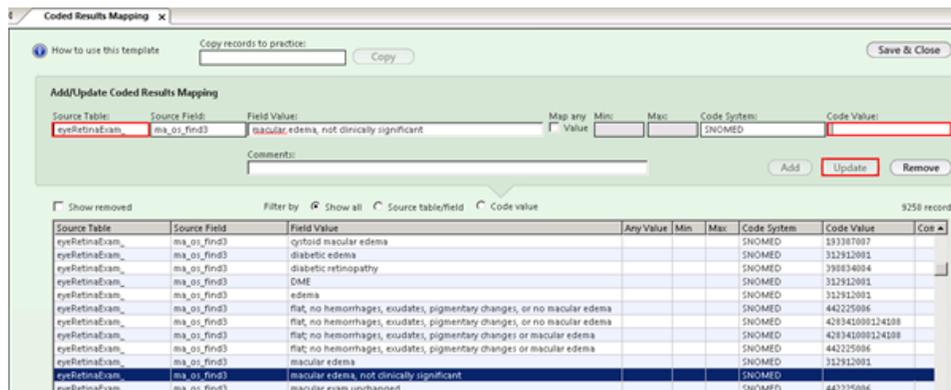

For more information, go to [NextGen Healthcare Success Community](https://www.community.nextgen.com/articles/UserGuides/Data-Sets-Setup-Practice-Template-User-Guide), and download <https://www.community.nextgen.com/articles/UserGuides/Data-Sets-Setup-Practice-Template-User-Guide>.

NextGen HQM Data Assumptions

The following list outlines some of the NextGen HQM data assumptions:

- Qualifying data from NextGen Adaptive Content Engine
- **Diagnosis** and **Diagnosis Date**
- **Lab Results** and **Lab Results Date**
- **Age**
- **Demographic Data**
- **Medication Dates**
- **Medications**
- `Order_table`
- Window templates
- **Visit Type**
- **Vital Signs**
